REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,105,721 to Furuta et al. The improvement comprises a modular valve assembly with a spring seat operatively attached by a snap connection to an air valve for the purposes of allowing the push rod to be installable after the modular valve assembly has been fitted into the brake booster and the brake booster has been tested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Furuta et al. is cited for the showing of a modular valve assembly similar to applicant's but lacking the snap connection of the spring seat to the air valve.
